STYLE UPDATE EVENT SERIES

The current update introduces a range of improvements and optimizations designed to make the user experience even more complete and effective.
Among the main new features included:

1. addition of new Styles;

2. renaming, reorganization, and removal of some duplicate content;

3. improved volume balancing across the different Style families;

4. general corrections and optimizations on various Styles;

5. improvement of the Live Guitar section, with more effective MIDI replacement management for non-audio chords and the introduction of dedicated voices;

6. addition of)   files inside selected Real Chord folders;

7. further corrections and refinements related to Real Bass, Real Chord, and Live Drum.
